About Horegener

Welcome to Horegener, where we blend artistry with functionality to create exceptional furniture pieces. As a distinguished furniture brand under TBK Metal, we take pride in our extensive array of products tailored to diverse tastes and preferences. Specializing in our signature designs and bespoke creations, our comprehensive selection spans a spectrum of styles, from timeless classics to contemporary marvels, ensuring you find the perfect complement for your decoration.

Whether you desire a meticulously designed piece ready to enhance your space instantly or a bespoke masterpiece crafted to your exact specifications, Horegener guarantees unmatched quality, elegance, and functionality in every product.

Explore our collection and let us exceed your expectations with our exquisite furniture pieces. Join us in transforming spaces with timeless elegance and impeccable craftsmanship.

Exceptional Quality

Quality is at the heart of our brand's philosophy. We carefully choose materials and use master craftsmanship ensuring that each product not only meets but surpasses all standards; promising strength with a long life.

Innovative Design

Select our brand's avant-garde design, which breaks from trends. The pride is ours for being the pioneers, in that we come up with furniture sets not only current taste but also innovation of style thus breaking new ground.

Attention to Detail

Our brand understands the significance of details. Our products are carefully designed revealing precision and attention to detail. In material selection or detailing it is the emphasis on refinement that makes everything look better.

Customer Centricity

We care most about your satisfaction. We commit ourselves to delivering an incredible customer experience with personalized service, rich post-sale support, and everything to give your journey a smooth enjoyable ride.

Redefine Outdoor Living

More than a kitchen, it is a complete outdoor living pod

A space where design, function, and social experience merge — bringing a new level of luxury to outdoor gatherings. It is not only a cooking unit, but a fully integrated environment designed for comfort and practicality. Function in an outdoor setting.

It elevates outdoor life, ideal for gathering, cooking and socializing.

Crafted with high-grade metal, it turns any outdoor area into an elegant leisure space. Durable and stylish, it fits homes and luxury resorts perfectly.

LUXURY APPEARANCE

PVD coating brings a high-end metallic finish that elevates outdoor aesthetics.

ENVIRONMENTALLY FRIENDLY

Recyclable materials, safe and sustainable for long-term use.

LOW MAINTENANCE

Smooth and non-porous surface for simple cleaning and care.

Reasons to Choose Us

CE Certified Appliance

All electrical components are supplied by qualified OEM manufacturers and comply with CE requirements.

Free Design Service

We provide free design solutions to support your concept development and project planning.

Extended Warranty

Electrical components: 2-year warranty. Complete unit: 5-year warranty.

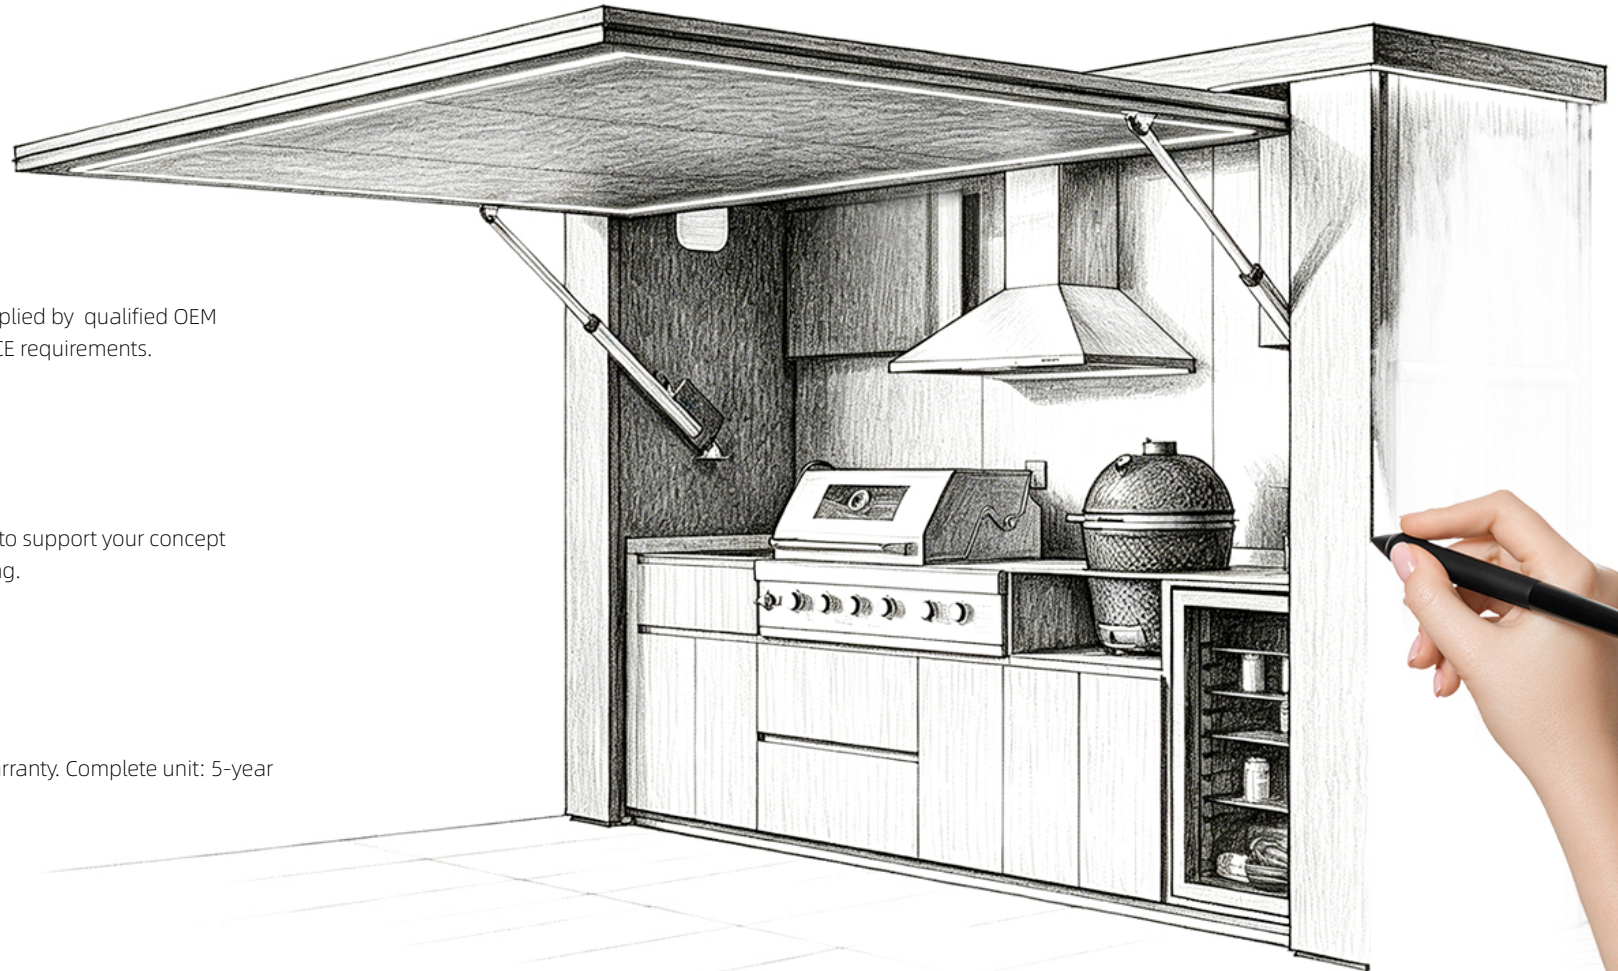

Fully Customizable

Appearance, layout, and electrical configuration can all be customized to meet project requirements.

Extra Safe

Industry-first H Safe System delivers reliable safety for your peace of mind.

TBK metal & Horegener Joint Design and Development

TBK metal and Horegener have partnered in joint design and development to create innovative, high-quality metal solutions. By combining engineering expertise, advanced manufacturing,

capabilities, and creative design concepts, we deliver products that balance functionality, durability, and modern aesthetics. This collaboration reflects our shared commitment to excellence, customization, and continuous innovation.

Safe

Integrated Intelligent Sensing Safety System

H SAFE is the integrated intelligent sensing safety system for BBQ POD doors and moving structures. It helps the unit sense human presence under the door, warn users clearly, delay closing and stop door movement when risk appears.

✓ Notices. Warns. Stops.

Integrated sensing for safer outdoor living.

1 Voice Prompt & Warning Light

Before closing, sound-light alerts are issued first and door closing is delayed. Alerts also activate when safety logic is triggered.

2 AI Human Presence Sensor

If a person is present under the door, door control is automatically disabled and sound-light alerts are issued.

3 Edge Anti-pinch Sensor

During door closing, triggering the sensor stops door movement immediately.

4 Power-off Self-locking Actuator

Helps hold the door securely when power is off.

5 Physical Control Buttons

Reduce accidental remote-control activation while remote operation remains available.

6 Emergency Stop Button

Stops door movement in any situation, overriding normal operation.

Warm Reminder

A large flip-up door should never rely on remote control alone. Layered sensing and stop logic help turn everyday use into a calmer, safer experience.

Human Under-door Lockout

If someone is already under the door, H SAFE disables door control and reminds users with sound-light alerts.

Layered Response

The system first warns, then locks out unsafe control and stops motion when protective sensing is triggered.

Safe

Integrated Intelligent Sensing Safety System

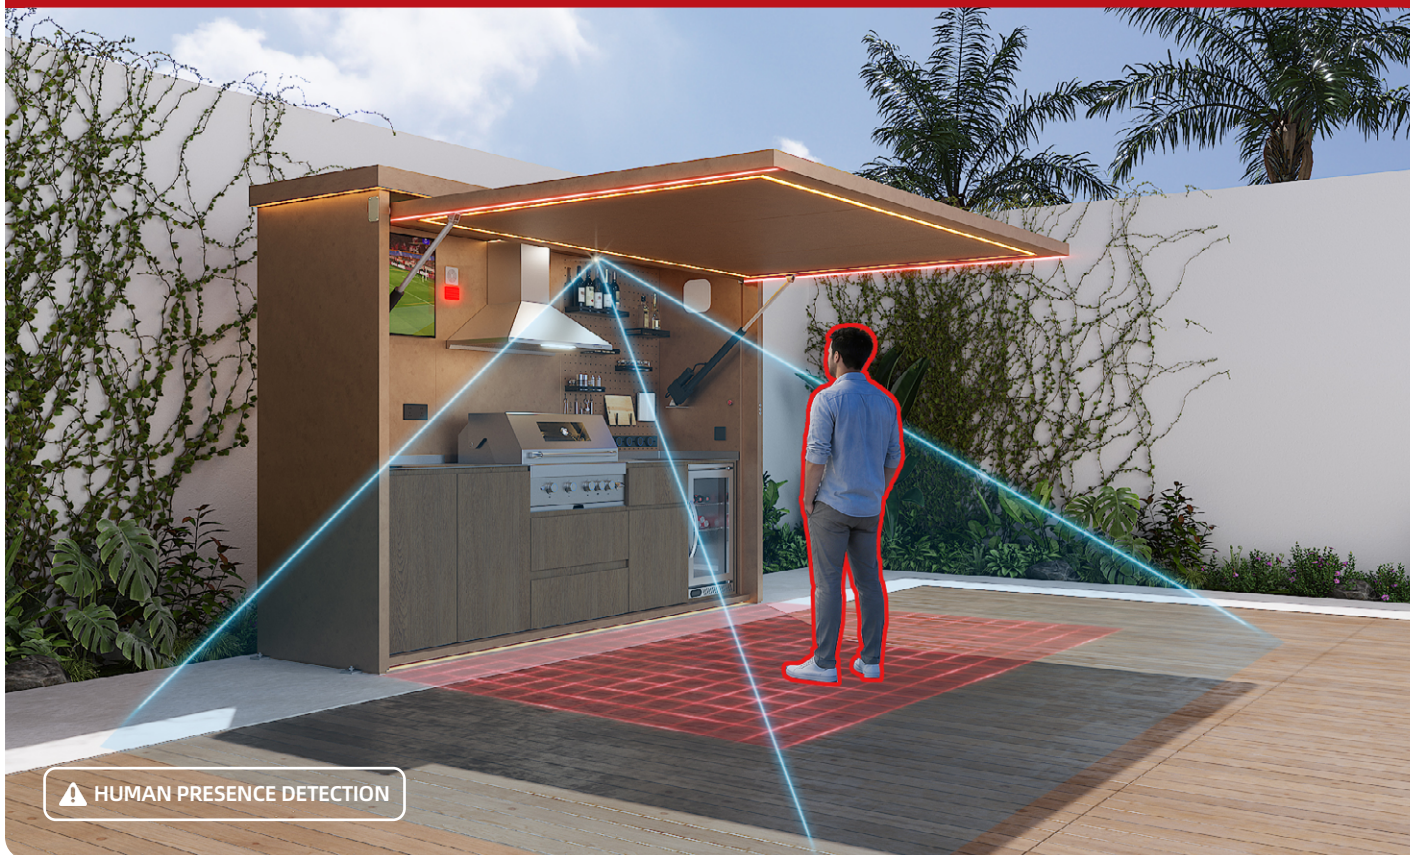

Notices. Warns. Stops.

Integrated sensing for safer outdoor living.

Human Presence Protection

Under-door detection, lockout logic and family safety scenario.

How the safety logic works

Before the door closes, H SAFE issues sound-light reminders and delays movement. If a person is present under the door, door control is automatically disabled and the voice prompt and warning light remind users to clear the area first.

Example: Remote Mis-touch

If a child takes the remote and accidentally triggers door closing, an unprotected heavy flip-up door may continue falling with no immediate way to stop it. That risk is unacceptable.

With H SAFE Detection

If human presence is sensed under the door, control is locked out and sound-light alerts continue until the area is clear.

Anti-pinch During Closing

If the edge anti-pinch sensor is triggered while the door is closing, the door can stop running immediately.

Emergency Stop Anytime

The emergency stop button is a priority stop input. It can stop door movement under any operating condition.
